

Foundations for Implant Success by Dr. Marshall Freilich

Speaker

Dr. Marshall Freilich

B.Sc., D.D.S., M.Sc., F.R.C.D.(C)

Dr. Freilich is a Fellow of the International Team for Implantology (ITI), and a Faculty Member of the annual Canadian ITI Education Week. He is Past-President of the Ontario Society of Oral and Maxillofacial Surgeons, and has authored several peer-reviewed journal articles.

11 October, 2018

Registration Time: 6:30 PM

Lecture Time: 7:00 PM - 9:00 PM

CE Credits: 2 CEC

Location: Pro-Art Seminar Facility - 855 Broadview Avenue

Overview

Implant dentistry is changing at an explosive pace. Dentists can often feel overwhelmed in trying to assimilate large volumes of new information, and in remaining comfortable and confident that their patients are benefiting from the most up to date technologies available.

In the face of rapid changing protocols, the foundations for presenting the implant option for patients, evaluating the clinical situation and formulating an interdependent, multidisciplinary strategy that can lead to successful and profitable implant supported restorations remain relatively unchanged.

The objective of this seminar is to review fundamental principles that will enhance the comfort and confidence of the dental office team to present the implant option to their patients, and to establish cost estimates that are reliable while minimizing the risk of cost overruns that can result in financial losses.

We will discuss methods for patient presentation and improving patient acceptance of implant therapy, the role of cone beam CT imaging as a diagnostic tool, the relative advantages of screw retained restorations versus cement retained restorations, and other topics that are aimed toward increasing the role of implants in your practice.
