**Registration Time:** 6:30 PM

**Lecture Time:** 7:00 PM - 9:00 PM

**CE Credits:** 2 CEC

**Location:** Pro-Art Seminar Facility - 855 Broadview Avenue

## Overview

Dental implant treatment has progressed well beyond the esoteric. Today's patients present at our offices with the expectation that not merely will their implant treatment prove to successfully integrate, but are esthetic. The question to be asked is not whether have we oversold implant treatment. Instead, our charge shall be to consistently meet, if not exceed, our patients' expectations.

We must begin by re-evaluating our concept of success beyond merely achieving integration or the implant is still in our patient's mouth! The marketplace demands natural esthetics as the benchmark of true success!

This seminar will provide guidance on timing the age to place implants, vectors of continued jaw growth, treatment sequencing, number of implants, hard and soft tissue grafting, site optimization and finally provisional and definitive restorative design. Each of these factors must be carefully considered before commencing implant treatment, especially in the esthetic zone. Finally, examples of surgical treatments to salvage esthetic failures will be presented. The cost of failure is truly too high!
